# MEGIDDO VI

The 2010–2014 Seasons (three-volume set)

Editors: Israel Finkelstein and Mario A.S. Martin

Authors: Israel Finkelstein, Mario A.S. Martin,  
Matthew J. Adams, Eran Arie and Assaf Kleiman

Megiddo, a key site for the study of the Bronze and Iron Ages, is unique among the sites of the ancient Near East. Featuring remains of over 30 settlements, Megiddo is strategically located on the main highway of the Old World, leading from Egypt to Mesopotamia. It is mentioned in important verses in the Bible and in Egyptian and Assyrian texts. Beyond archaeology, it is of great significance to the fields of the history of ancient Israel and biblical studies. The Tel Aviv University excavations at the site aim, through the implementation of modern methods, to achieve a full stratigraphic-chronological sequence, while placing special emphasis on studies related to the exact and life sciences. The three volumes of *Megiddo VI: The 2010–2014 Seasons* display a rich set of finds, spanning about 1,000 years of history from the Middle Bronze Age to the Iron Age IIB. They include a large number of studies in archaeology and the exact and life sciences, including topics such as radiocarbon dating, geoarchaeology, paleomagnetism and metallurgy.

This three-set volume was edited by Israel Finkelstein, Professor Emeritus of Archaeology at Tel Aviv University and Head of the School of Archaeology and Maritime Cultures, University of Haifa, and by Mario A.S. Martin, Research Fellow at the Institute of Archaeology of Tel Aviv University and at the Leon Recanati Institute for Maritime Studies of University of Haifa.
